

COMPENG 2SH4 Project – Statement of Contribution

Your Group Number double pump

Your Name Mohit Chopra

Your Team Member's Name Aaditya Anil

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - Worked on iterations 1A, 1B, 2A individually
 - Collaborated with partner on 2B, function 2 of iteration 3 (food consumption and body growth) and function 3 of iteration 3 (game over condition)

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - Partner worked on Iteration 3 function 1 (making snake body into arrayList) and the bonus individually
 - Collaborated with partner on 2B, function 2 of iteration 3 (food consumption and body growth) and function 3 of iteration 3 (game over condition)

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.
 - An issue I had was merge conflicts when pulling new changes from the github repo, it was confusing to figure out how the VSCode merge editor worked.
 - A benefit of working with someone was being able to split up the workload easily and work on different features at the same time asynchronously
